

Security Testing for IT Services Company

THE REVIEW

„We were very satisfied with their work every step of the way.”

THE CLIENT

Business Development Partner,
Deviniti

 IT Services

Project summary:

LogicalTrust.net performed a series of security tests for an IT services company's web app. The goal was to detect any possible errors that could compromise integral parts of the client's service.

Feedback summary:

LogicalTrust.net submitted a detailed report of potential threats with recommendations that were proven useful for the platform. The company felt as if their cooperation was fruitful, efficient, and timely. In the end, their suggestions had improved the internal team's confidence and performance.

BACKGROUND

Please describe your company and your position there.

Deviniti is a company which specializes in Digital Transformation and Custom Software Development, where I'm in a role of Business Development Partner.

OPPORTUNITY / CHALLENGE

For what projects/services did your company hire LogicalTrust.net?

We engaged LogicalTrust.net to perform a set of penetration tests designed to detect any possible errors that could affect integrity, confidentiality and availability of one of our web application, as well as Source code security analysis.

SOLUTION

How did you select this vendor and what were the deciding factors?

We have been working with this company for many years and used them before for other projects.

Describe the project in detail and walk through the stages of the project.

We contacted LogicalTrust team so they could evaluate the project. Once the quote accepted, they audited our website code along with security testing of the product. Afterwards they produced a detailed report with recommendation regarding the next steps.

How many resources from the vendor's team worked with you, and what were their positions?

All security tests were performed remotely by a minimum of two independent experts

RESULTS & FEEDBACK

Can you share any outcomes from the project that demonstrate progress or success?

We received a very detailed report with list of potential threats along with recommendations which was extremely helpful and brings us a high level of confidence regarding the security of our platform.

How effective was the workflow between your team and theirs?

The cooperation very fruitful and the team delivered the task efficiently and on time.

What did you find most impressive or unique about this company?

They have a high level of expertise and their recommendations along with suggested changes to the source code in turn improved our processes.

Are there any areas for improvement or something they could have done differently?

We were very satisfied with their work every step of the way.
